The Latest Advancements in CCTV for Utility Locates

Presented by: Larry Oliver & Eric Mandery

THIS SESSION IS SPONSORED BY

MASON
PRIVATE LOCATING

What is CCTV?

Closed Circuit Television Inspection (CCTV) is one of the most effective methods to visually locate & inspect pipes and conduits.

Just how much sewer are we talking?

Over 800,000 miles of Public Sewers in the U.S.

500,000 miles of Private Sewer Laterals connecting Private properties to public lines

Each of these is susceptible to structure failure, blockages, overflows, and utility strikes!

Across the U.S. Estimates Suggest there are:

More than 3.5 Million Miles of Storm Sewers

270 Million Storm Drains

2.5 Million Stormwater Treatment Assets

NO SECOND GUESSING

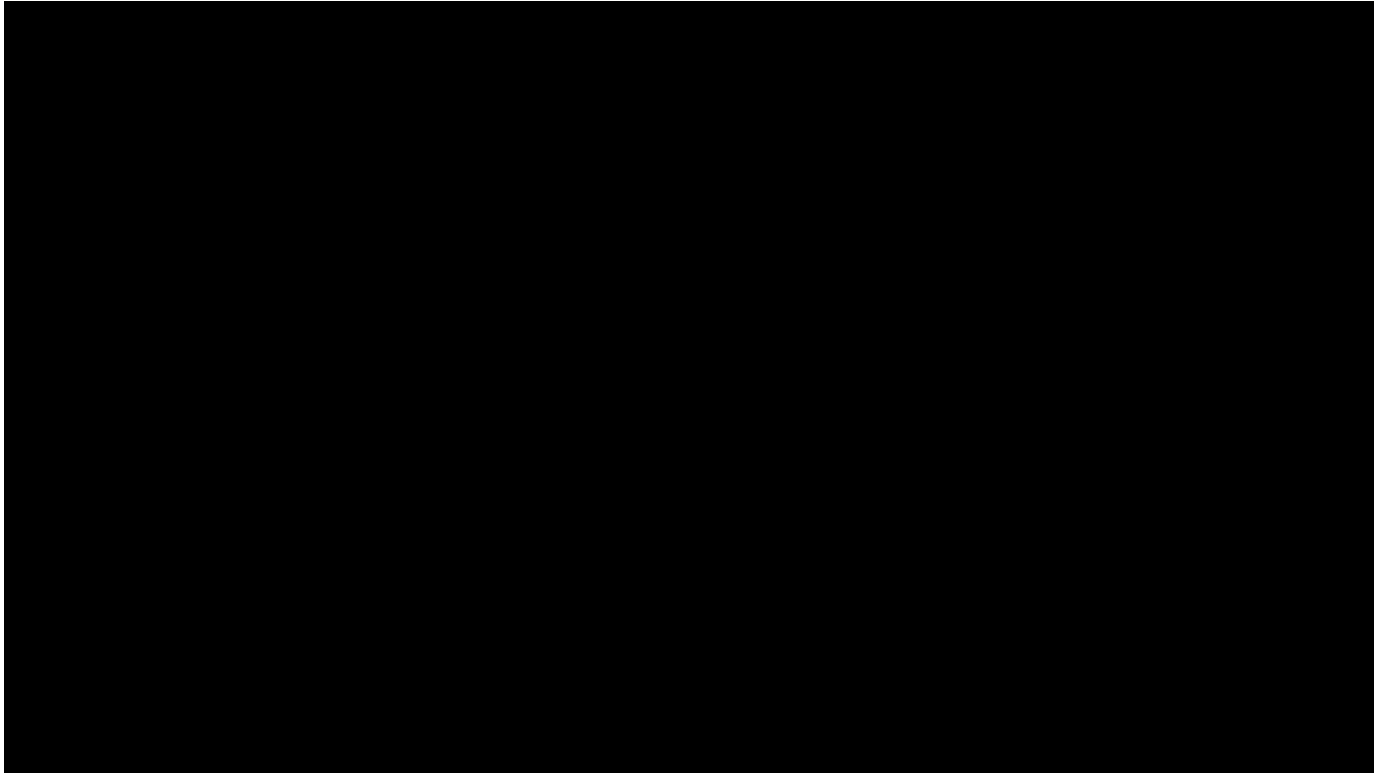

3 Core Services for CCTV

Locating | Inspection | Cross-bore Mitigation

LOCATING

Why is CCTV used for utility locating?

Accuracy

Non-destructive

Comprehensive

Efficient

ACCURACY

How accurate
are current sewer locates?
In today's world, most
sewer are located by
line of sight...

CCTV provides the most accurate way to mark any sewer line!

So when is CCTV used for utility locating?

Troubleshoot Problems

Before Excavations Begins

Assess the Condition of Utilities

Map Underground Utilities

INSPECTION

What are the benefits of sewer camera inspections?

Accurate Diagnosis

Proactive Maintenance

Cost-Effectiveness

Regulatory Compliance

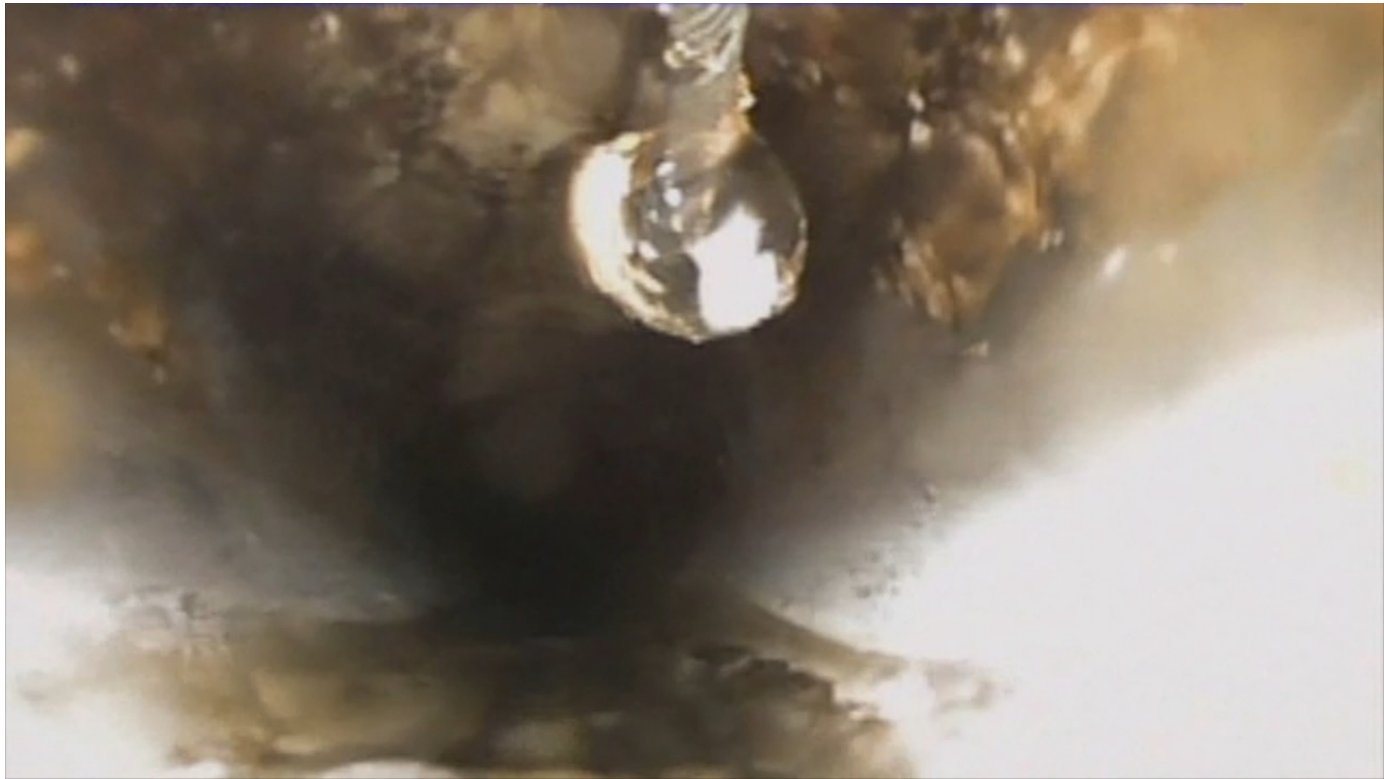

Cross-bore Mitigation

What is a cross-bore?

A cross-bore is defined as the intersection of an existing underground utility or underground structure by a second utility installed using trenchless technology. This results in an intersection of the utilities, compromising the integrity of either or both utility or underground structure.
